How do I prepare for an MRI exam?

Preparing for your MRI exam is easy:

- There are no specific preparations needed. You may go about your normal activities and take your routine medications unless instructed not to by your physician.
- If you are not receiving contrast, please arrive 30 minutes before your scheduled appointment
- If you are receiving contrast, please arrive 60 minutes before your scheduled appointment
- If you are receiving sedation, please arrive 60 minutes before your scheduled appointment and do not take your sedation medications until you arrive in our office and are told to take the medications by our MRI staff
- Once you have arrived and checked in, you will be met by one of our trained MRI Technologists who will review your paperwork, carefully screen you for conditions that may be problematic and answer any questions you might have about your scan.
- Please tell your MRI Technologist before the MRI if you have a pacemaker, artificial heart valve, implanted drug infusion port, intrauterine device (IUD) or any pins, metallic implants, aneurysm clips, or metal fragments from previous injuries or surgeries.
- Before your scan, you may be asked to change into a gown/scrubs. No keys, coins, credit cards, dentures with metal components, hearing aids, jewelry or cell phones are allowed inside the room where the MRI scan takes place.
- Your physician may have ordered a contrast agent for certain exams to enhance the images for interpretation. If so, an intravenous line (IV) will be started in your hand or arm.

If you have any questions or you know you are running late for your exam, please call the MRI Dept. at (919)785-3400 for assistance.

Directions: Take I-440 Beltline to Six Forks Road North, Exit #8B. Continue on Six Forks Road thru 9 stoplights (9th stoplight is Millbrook). We are the 4th driveway on the right at 5838 Six Forks Road.
